ABOUT THE COMPANY

The Client wanted us to provide a comprehensive website that will provide socio-economic data in enhanced visualized form.

CHALLENGE

The client needed accurate statistical data to be visualized so as to ensure greater satisfaction to the end users.

SOLUTION

GNTS Technologies mapped the nationwide socio-economic data under major categories like administrative units, Crime and law, Foreign trade, Insurance, Mines and Minerals and Travel. The website has membership module, administration module, payment module and Pentaho (BI) Integration.

In the membership module, GNTS offered a customized membership interface allowing users to choose a plan of their choice suiting their purposes. The membership plans offered a spectrum of services allowing the users to data variables selection, geography of India with custom selection, different types of pictorial representation, data export, analysis, multi-user interface and many more.

The payment and administration module facilitated smooth transactions and easy management of data.

TECHNOLOGIES/TOOLS USED

MySQL, Petntaho (BI) Server, Express, Angular JS, Node.js, Git-hub

RESULTS

We provided SaaS based B2B solution which helps the startups and existing business to take some decision based on statistical data about the country and start / expand the business.

- > Better and easy understanding of data.
- > Effective management system to assist the end-user and the owner.
- > Payment interface for hassle-free transactions.
- > Caters expectation of all people world-wide.
